

# LAB XL

# Sounds familiar?

- Have you talked with your manager?
- How about privacy?
- Where is the risk analysis?
- We have tried this already, without success
- That is politically sensitive
- Did you check with the legal department?
- Did you involve your stakeholders?
- Is it possible within the purchasing framework?

# Lab XL is a laboratory

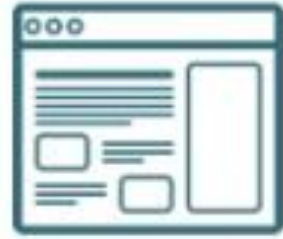

That means we have a licence to fail 😊

- Bottom up innovation
- More than 70 members
- Frequent meetings – knowledge sessions - workshops
- Mandate from the board voluntarily and partly in your own time
- Resources for the projects
- Multidisciplinary project groups
- Focus on improvement for the citizens
- Involvement from students (Fontys)
- Teaming up with other partners and the possibility for upscaling; etc. etc. etc.
